Our endeavor is to ensure that your applications & products are released 'On-Time, Every-Time' as per your quality standards.

- System Tesing/Integration Testing
- Manual/ Automation Testing
- User Acceptance Testing
- Support and Maintance
- Mobile Application Testing
- Interactive Voice Response & Contact Center App Testing
- Functional Test Automation Services
- Application Performance Testing

Managed Test **Services**

Under Managed Test Services, we offer end-to-end testing services and take ownership for all test functions and manage your testing projects with experienced Test Managers & Testers.

Our extensive experience and proven methodologies will ensure that your applications and products are released as per your design and quality standards.

System Tesing/ Integration Testing	Manual/ Automation Testing
User Acceptance Testing	Support and Maintance

Specialized Test **Services**

Software complexity has increased recently due to distributed and multitier applications targeting multiple devices such as mobiles, tablet, etc. Verification & Validation services need to go beyond traditional testing to ensure optimum performance of an application on all devices. We offer the following specialized test services:

Mobile Application Testing

Interactive Voice Response & Contact Center App Testing

Functional Test Automation Services

Application Performance Testing

☑ Our in-house SWIFTest automation tool will help you reduce time on your regression & User Acceptance Testing.

☑ Sensiple's Testing Center of Excellence will help you keep pace with the technology & current tools in the market.

☑ Sensiple is one of the pioneers in offering IVR testing and Contact Center App Testing Services.

☑ Trusted partner for Fortune 1000 companies for testing mission critical projects.

☑ Proven global model with centers in US, Singapore and India.

☑ ISO 9001:2008 Certified

☑ Over 14 years of experience in testing various products and applications.

SWIFTest – SENSIPLE's Automation Tool & Accelerator

- SENSIPLE's SWIFTest is a lightweight & robust automation testing tool for web applications that reduces functional regression testing effort by as much as 65%.
- Building automated test cases is now a simple 4 step process using SWIFTest.
- SWIFTest supports the Regression testing of your web applications across multiple browsers & machines simultaneously.

Why Automated Testing?

Companies across various industries are increasingly relying on Web Applications thereby increasing the dependency on the Web to make their customers happier and increase their sales revenue and profit. Web applications undergo constant changes to meet the evolving market demands and customer expectations. Automated Regression suites ensure quality across the multiple web versions while keeping the costs at an acceptable level and reduce the release cycle times thereby helping companies to remain competitive in their business.

Highlights of SWIFTest ?

- Built on robust framework (data driven, key word driven).
- Handles frequent UI changes easily with minimum effort. SWIFTest helps you to create functional tests easily with just 'points and click'. It runs your tests across all major browsers.
- Ease of adoption in terms of learning, cost and maintenance – Business Users can use SWIFTest to perform UAT & use the tool to easily capture the scenarios and automate the UAT testing to reduce the cycle time.
- Effective Test reporting. – good report with detailed reporting on defects.
- Reduced Cost of Automation – 30 to 40% less expensive.
- User Friendly Test Automation – No Scripting.
- Easy to set-up and get started quickly.
- Enables compatibility testing across multiple browsers.
- Enables Distributed testing.
- In-built Scheduler.

Features

- Robust Automation Framework
- User Friendly Test Automation
- Easy to Install & Get Started quickly
- Comprehensive Object identification
- Supports Data Driven & Keyword driven tests
- Supports Continuous Integration
- Automatic Test Scheduling
- Step-wise screenshots
- No real-time monitoring required
- Comprehensive Test Reports & Logs

Value to Customer

- Consistent Quality
- Higher Productivity
- Quick Time to Market
- Supports Agility
- Reusable

CORPORATE INFORMATION

SENSIPLE is an information technology consulting and business services company. SENSIPLE has presence across three continents - North America, Asia and Europe, working with multiple companies providing industry leading solutions.
